Profile

Passionate about technology and a Java Backend programmer (Trainee), I'm currently studying at the University but that has not stopped me from learning on my own the necessary tools to create applications.

I want to take my first steps in the working world of programming, I am looking for my first formal job where I can have an opportunity to give my best and support the work team with my skills.

My English's level is intermediate but I can communicate my ideas and I continue to learn every day and although my initial learning was with Java, that does not stop me from learning any other technology.

Education

Bachelor's Degree

Jesus Jaimes Altamiranda, Valencia
